

OpenTech IoE Supported Thermostats September 15, 2021

Since July of 2018, the OpenTech IoE Control Center operates with the Honeywell Lyric Round and T Series thermostats. These units are available both online and local home improvement stores.

Honeywell thermostats were selected because they support the setting of temperature via API's (Application Programming Interface) that in turn allows the Control Center to access features of the devices.

Additional information on the Honeywell thermostat integration can be found in the following documents in the Help section of the Control Center:

- Honeywell Thermostat Configuration Guide
- Honeywell Thermostat User Guide

The OpenTech IoE / CIA team is available to address any questions:

(602) 773-1700 (Option 1) **or** via email at ioesupport@opentechalliance.com
